# 2024 NEVADA TROPHY FISH PROGRAM

Welcome to the 56th edition of the Nevada Department of Wildlife's Trophy Fish Book, a product of the Trophy Fish Program which was initiated in 1968 to recognize the talents, or luck, of anglers for catching notable-sized fish from many of the over 800 waterbodies throughout the state. This program recognizes anglers for catching "trophy" sized fish in any of 30 different fish species, each having a designated minimum weight for entry.

Congratulations go out to the 34 anglers that entered 142 fish into the Trophy Fish Program in 2024. It is not common to catch a fish that meets the minimum weight requirement of a trophy fish, and in 2024, 116 of the fish entered met the minimum weight, including 53 Common Carp, 23 Rainbow Trout and 16 Lahontan Cutthroat Trout. The remaining 24 fish were a mix of 13 different species including Largemouth, Smallmouth, and White Bass, Bullhead and Channel Catfish, Sacramento and Yellow Perch, Bluegill and Green Sunfish, Lake and Tiger Trout, Mountain Whitefish and Walleye. You will also see throughout this book that 24 additional records were set at waters previously having no established records for that species of fish. So, remember, you can still enter an undersized fish as long as there is no previous record from that water, or if the weight beats the current record.

While there were no state records broken in 2024, there was no shortage of big fish caught around the state. The table below portrays all the new water records for catches that met the minimum weight qualifications at several waters throughout the State.

In 2024, two anglers completed the Native Fish Slam, making Dan Castleberry and Stephen MacMillan the 32nd and 33rd anglers to complete the challenge since the program started in 2012. As a matter of fact, Stephen MacMillan was the first person to complete the Native Fish Slam in Nevada in 2012, and this is the third time he has completed the Native Fish Slam. Well done, Stephen! The Slam consists of catching and entering the six native sport fish found in Nevada – Lahontan, Bonneville, and Yellowstone Cutthroat Trout, Redband Trout, Bull Trout, and Mountain Whitefish. There are still about 169 other anglers currently working to complete the slam and, of course, there is no time limit, so take your time and enjoy exploring Nevada's backcountry in pursuit of its native trout!

The following pages describe current and historical trophy fish catches from Nevada's waters. We hope the great success that anglers found last year will inspire you to head out and enjoy the great fishing Nevada has to offer.

**NOTE:** These records are officially recognized by the Nevada Department of Wildlife as state records established from the year 1968, the first year of the Nevada Trophy Fish Program through December 2024. These records include fish taken in interstate waters including Lake Tahoe, Topaz Lake, Lake Mead, Lake Mohave and the Colorado River. It is recognized that some species of fish of larger size have been caught from Nevada waters prior to 1968.

World Record data was obtained from the International Game Fish Association's World Record Game Fishes 2024 edition.

\*NOTE: The recognized world record Cutthroat trout of 41 pounds was caught from Pyramid Lake in 1925.
