

DUFURRENA PONDS

ANGLER AND FISH SURVEY INFORMATION

Brad Bauman- Fisheries Biologist, Winnemucca Field Office
705 E 4th Street. Winnemucca, NV 89445 (775)-623-6565 ext 105

General information: Dufurrena Ponds is a warmwater fishery. Most of the angler use is on Pond 20. Largemouth Bass, Bluegill, Yellow Perch, Pumpkinseed, Redear Sunfish and hybrid sunfish. Most of these species are self-sustaining but are augmented on occasion. The state record Yellow Perch of 1 pound 8 ounces stood since 1987, but it was recently broke in 2023 with a fish caught in Wildhorse Reservoir that was 1 pound 9 ounces. Road access is good, and these ponds are located less than 1 mile off SR 140.

Location: Humboldt County, Sheldon National Wildlife Refuge, 26 miles west of Denio Junction. Use our FishNV tool (<https://fish.wildlifenv.com/>) to find waters near you, and buy your fishing license at ndowlicensing.com.

Size: Pond 20 is 50 surface acres with a maximum depth of 14 feet.

Management: Nevada Department of Wildlife manages the fishery as a General Warmwater Fishery. The USFWS Sheldon National Wildlife Refuge manages the adjacent lands. Please observe all rules and regulation of the Sheldon National Wildlife Refuge.

Amenities and General Info

- Developed Camp sites at Virgin Valley Campground
- Restrooms and Showers
- No boat ramps
- Float tube, pontoon boats, kayak, canoes, and small boats recommended

Fishing/Boating Regulations

- Season opens year-round
- Limit is 15 warmwater game shish of which not more than 5 can be Largemouth Bass
- Vessels must be operated at speeds that leave a flat wake. Electric motors only.

Previous stocking

2021

White Crappie 500 4.0 inches

- Species are typically self-supporting in Dufurrena Ponds, but periodic stocking may be required to supplement existing populations.

Standard ice flies for Yellow Perch.

Fishing notes

- Best fishing typically occurs starting in Late April – September.
- Spinner baits, rooster tails, and dropshot plastic worms and soft plastics are standard baits for Largemouth Bass. Top water baits can be effective in the evenings.
- Small rubber jigs or plastics tipped with a worm is effective for Crappie, Bluegill, Yellow Perch, and Sunfish.
- Ice fishing in the winter can be productive for Yellow Perch using small jugs tipped with a worm or small ice flies

Crappie	5.1-7.8"	7.9-9.8"	9.9-11.8"	11.9-14.9"	15+"

2025 Fishing Forecast - Water levels should be normal with most ponds near full capacity. Fishing is expected to be good in late spring and early summer. Aquatic vegetation can limit shoreline access during the summer and a float tube or canoe can help you get to open water. Ponds 19 and 20 are expected to be the most productive and popular this year with good numbers of sunfish, Yellow Perch, Largemouth Bass, and sunfish are the most common fish caught. 2024 angler catch rates were 2.00 fish per hour and 5.77 fish per angler. Anglers can expect to catch 12–15-inch Largemouth Bass, Yellow Perch over 8 inches, and sunfish 6–8". Fishing is expected to be fair to good in 2025.
