PURPOSE

The Board of Wildlife Commissioners shall establish policies necessary for the preservation, protection, management and restoration of wildlife and its habitat and shall utilize its authority to carry out a program for conserving, protecting and propagating native fish, wildlife and other vertebrates and their habitats.

POLICY

The Board of Wildlife Commissioners does hereby establish the following policy to provide for the preservation, protection, management and restoration of wildlife and its habitat:

1. The Director, Department of Wildlife, to the maximum extent practical, shall review water applications submitted to the State Engineer for the appropriation of waters to determine the impact on wildlife and its habitat.
2. If it is determined by the Director that granting the application would threaten or cause significant impacts to wildlife or habitat resources, the Director shall, within 30 days from the date of last publication of notice of applications, file with the State Engineer a written protest against granting the application, setting forth with reasonable certainty the grounds of such protest.
3. The Director shall advise the State Engineer and the applicant that such protest will be withdrawn if, in his opinion, adequate safeguards are provided for wildlife or habitat.

The Board of Wildlife Commissioners recognizes the economic value and benefit of long-established agricultural development resulting, in part, from the use of drilled wells and free-flowing artesian wells. The Board will consider and review legislation that cause detrimental effects on wildlife and habitat resources.

This policy shall remain in effect until amended, repealed, or superseded by the Board of Wildlife Commissioners.

BY ORDER OF THE BOARD OF WILDLIFE COMMISSIONERS IN REGULAR
SESSION, NOVEMBER 4, 2022.

Tommy Caviglia, Chairman
Board of Wildlife Commissioners
