

**Species:** Antelope

**Unit Group:** 151, 153, 156

**Hunt Geometry ID:** 117

**Hunt ID:** [509]

**Access:**

Units 151, 153, and 156 are readily accessible via several well-maintained dirt roads off highway 305. Four-wheel drive may be necessary when roads are wet, and high clearance/four-wheel drive is necessary to access some side roads.

**Recommended Hunting Areas:**

The majority of animals can be found in and around agricultural fields in Antelope Valley (junction of units 153 and 156) and Buffalo Valley (SW corner of unit 151). However, antelope can be found in lower densities in non-agricultural areas throughout the valleys and lower elevation hills across the unit group. In non-ag areas, during most hunting seasons, antelope will be closely associated with reliable water sources.

**Biologist Comments:**

While most of this area is comprised of public land, most pronghorn congregate on private property, specifically agricultural fields. It is the hunter's responsibility to determine land ownership and obtain permission prior to accessing or hunting on private property.

Battle Mountain and Austin provide gas, food and lodging, and a small hospital is located in Battle Mountain. The BLM provides a developed campground at Mill Creek approximately 20 miles south of Battle Mountain. The USFS provides a fee campground at Bob Scott Summit on U.S. Highway 50 about six miles east of Austin. Dispersed camping at undeveloped sites is permitted throughout the hunting units on public lands. Check with the land management agencies for fire restrictions and dispersed camping regulations.
